

Origo Pendant Lamp

SPECIFICATION SHEET

DESCRIPTION

Geometry in its purest form. Origo embodies opposite essences mirroring volcanic rock and an opal glass diffuser. An exploration of interaction, light shining onto the texture of the volcanic rock, revealing its relief and contour. Sober and logical, both materials create a relationship between light and composition. Balance in its essence, lightness and heaviness expressed through a timeless piece. Spheres work as a double geometry, mirroring positive and negative. Reinforce the fundamental relationship between light and shadows.
