

Product installation instruction

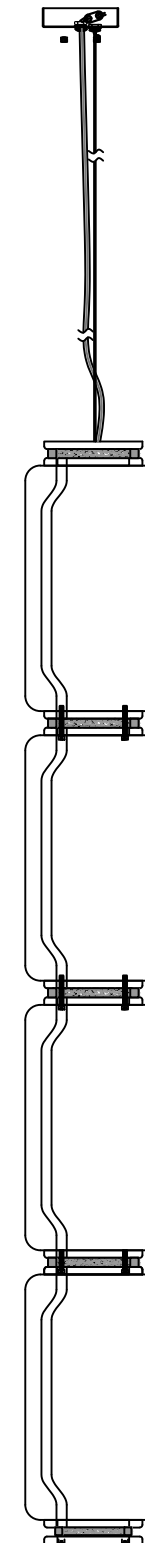

Please read this manual carefully before installation and keep it

Tips: The purchased product must be installed completely, before the light can be energized, (if the installation is not complete, the power on will cause the voltage to mismatch and damage the lamp beads, and the light source will not be bright) !!

Precautions: Please wear gloves for installation and power-off operation

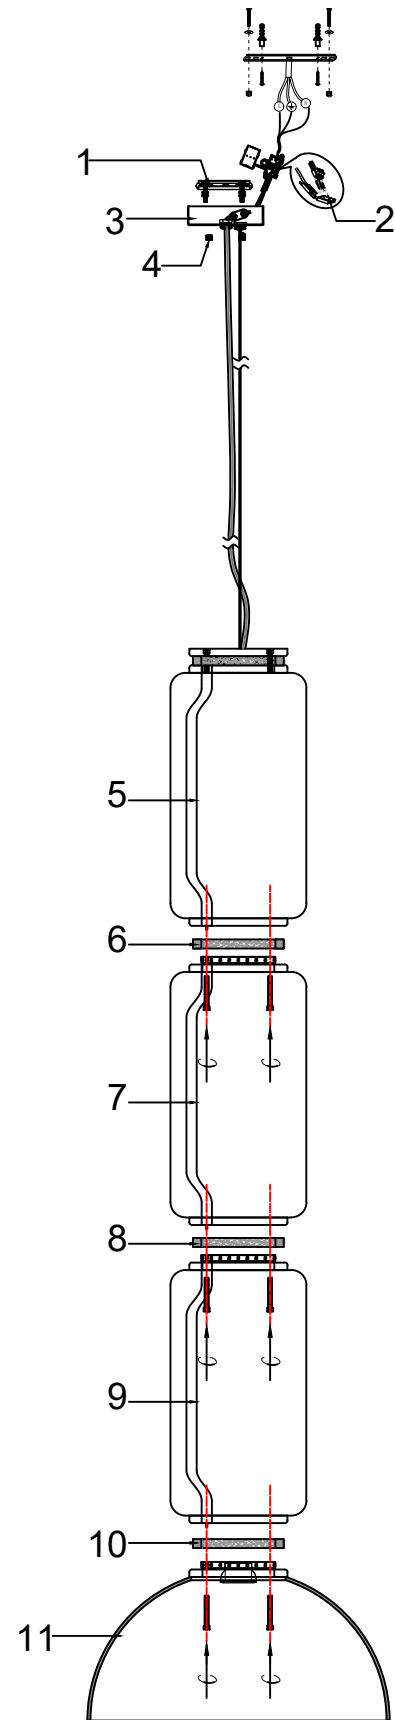

Please replace 6, 7, 8, 9,
First, put the acrylic trap on the LED of the lamp body,
Then turn the lamp body and acrylic circle up
Align the male and female plugs and install them slowly,
Finally, tighten the screws or nuts.

Install all the parts of the lamp as shown in the picture and confirm that they are firmly installed before normal use of power.
